

## CONFIGURING SMU VPN FOR MAC OS (OSX)

If you are using a Macintosh computer there are versions for Power PC-based and newer Intel based Macintoshes.

1. Open your web browser and download the file that goes with your type of Mac – the files are located at <http://www.law.smu.edu/lawtech/vpn.aspx>
2. The file will save to your machine -- usually in your downloads folder
3. Double-click the file and a new "disk" will show up on your desktop
4. Double-click the VPN disk and run the VPN installer PKG file
5. Click Continue as prompted
6. When asked if you agree to the license click agree
7. Click Install when prompted by the system -- a verification box asking for you to enter your \*system\* password will appear, enter the password and click OK
8. Click Install when prompted by the system -- a verification box asking for you to enter your \*system\* password will appear, enter the password and click OK
9. The software will install and will ask you to click close when complete. Click close
10. Find the VPN software using the Spotlight program and run it
11. Once this is done, enter "securenet.smu.edu" in the "Connect To" box and enter your SMU ID and email password into the credentials boxes
12. Click Connect

A video is available on the Lawtech website (<http://www.law.smu.edu/lawtech/vpn.aspx>) providing step-by-step instructions for the process.
